

FIRSTSPEAR™ STRANDHÖGG MARITIME USN PLATE CARRIER SYSTEM

Patent Pending

◀ NEUTRALLY BOUYANT BALLISTIC PLATE

MARITIME SEALED SOFT ARMOR INSERT ▶

Approved for Naval Maritime Operations. Meets ballistic resistance standards specified by the United States Navy and endorsed for procurement by NAVSEA as a ballistic protective system.

COMPLETE SYSTEM WEIGHT

10.8 lbs

(Carrier, Ballistic Plates/Soft Armor and Floatation in Large Size)

GREY

COYOTE

Reconfigured for 2013, this system is tailored specifically for Open Water Maritime Operations. Combining the elements of Ballistic & Maritime Safety, the system utilizes Trelleborg materials on the front as well as NR-86 antimicrobial mesh on the side closest to the body. This system will drain instantly as well as recover rapidly from sea water exposure with a simple fresh water rinsing. The complete system contains a sized Inflatable Floatation Cummerbund, 2" Belly Band, removable Buoyancy Compensation (BC) Inserts, and is sized to fit specifically the "Swimmer" Cut Neutrally Buoyant Ballistic Protective Plate with accompanying fitted Ballistic Soft Armor backers. BC Inserts help maintain slightly neutral capability while transporting a basic load of equipment. Both wings of the Strandhogg Maritime Plate Carrier Front Panel have pockets with adjustable tie downs that can hold radios similar to the size and shape of the AN/PRC-148 (MBITR) or AN/PRC-152 (MBHH) and can even be adjusted to fit the 60 Round Surefire M4 Magazine. Utilizing the latest in FirstSpear™ technologies, including the 6/12TM pocket attachment system and TUBESTM this is a state of the art capability designed to directly support Maritime Open Water Operations. Available in Grey and Coyote.

PART # 300-90-00024-9016-00:

Maritime Lite including all Flotation & Armor (Available as M/L or XL)

PART # 300-90-00025-9016-00 :
