CRACKING THE FR PROTECTIVE OUTERWEAR CODE

It is relatively easy to make FR clothing. It is also relatively easy to make clothing that protects you from cold and wet weather. But, until now, it has been very hard to do both in the same garment. While widely used FR textiles, like Nomex and Modacrylic, are fine for FR protection, they come up short when measured against traditional outerwear textiles, those that keep you warm, dry, and comfortable. Nomex, on its own, performs poorly in cold/wet environments, and Modacrylic, frequently used in base layers, that produces off gases that smell awful and has some questionable chemical properties.

Wild Things has been working on this FR challenge for years now, and we are pleased to present our new line of FR clothing, providing both FR protection and the cold/wet weather performance excellence you

expect from Wild Things in each garment. We used a range of new materials in this line, matching the performance characteristics of each to the intended use of the particular garment. We worked with the best fabric vendors, combining their newest, most advanced, textiles with our design and fit expertise. The result? Useful technical garments that solve the FR challenge.

- Our base layer keeps up with the latest thinking in the consumer market, incorporating fine gauge wool with FR Rayon. Wool has natural FR properties and does not require additives to resist flame. It is also naturally odor resistant and does not have the foul smell that some older FR technologies possess, including Modacrylic.
- Our mid layers – the Smoking Jacket™ – are made with a proprietary 4-layer system that provides complete FR protection.
- Our Hard Shell utilizes W.L. Gore's latest innovation – PYRAD® – that combines Gore's traditional waterproof/breathable performance with FR protection.

The Wild Things new FR line combines the latest technology from our textile suppliers with our expertise in designing apparel for cold/wet weather. The result is a powerful new tool for the Warfighter that solves the FR challenge.

BASE LAYER-FR-LIGHTWEIGHT

First layer for three-season use

Finally, full base layer wicking performance is combined with FR protection – in a new textile that does not have the odor issues of most other FR fabrics.

Wild Things fabric development team presents three FR base layer fabrics, each utilizing different combinations of wool, FR Rayon and Lycra to provide the best performance and protection in three different weights. These Next-Gen materials (no Modacrylic) allow for strong cold/wet weather performance AND FR protection without the awful smell that characterizes most existing FR base layers on the market today.

The Wild Things Base Layer-FR-Lightweight provides FR protection, moisture wicking and a superb softness for next-to-skin comfort. This material, a combination of 33% wool, 55% FR Rayon and 12% Lycra, wicks moisture well, does not retain body odor and provides superior FR protection.

FEATURES Form fitting design with flat seam cover stitch for maximum comfort and durability • 4.2 oz/sq yd fabric weight • Antimicrobial treatment combined with Wool to resist odors • Passes ASTM 6413; No Melt, No Drip • Made in U.S.A. • Berry Amendment Compliant

Long Sleeve Crew-FR-Lightweight Shoulder seam has been moved off the top of the shoulder to prevent chafing while wearing a pack or vest • Wrap around side seams follow the body's contour to enhance fit and comfort • Weight: 5.8oz

Bottoms-FR-Lightweight Gusseted crotch allows for full range of motion without constriction • Curved leg seams map the contours of the body to enhance fit and performance • Weight: 6.9oz

Short Sleeve Crew-FR-Lightweight A high-performance T-Shirt carefully designed to perform and protect • Shoulder seam has been moved off the top of the shoulder to prevent chafing while wearing a pack or vest • Wrap around side seams follow the body's contour to enhance fit and comfort • Approved by the US Air Force for use with FR uniforms • No Melt No Drip (NMND) Next-to-Skin Approved Product List • Weight: 3.8oz

Boxer Briefs-FR-Lightweight Comfortable fit with FR protection for vital areas • Approved by the US Air Force for use with FR uniforms • No Melt No Drip (NMND) Next-to-Skin Approved Product List • Comfortable waistband • Easy-access fly • Gusseted crotch prevents constriction and allows for full range of motion • Weight: 3.9oz

BASE LAYER-FR-MIDWEIGHT

Cool to cold weather base layer

Finally, full base layer wicking performance is combined with FR protection – in a new textile that does not have the odor issues of most other FR fabrics.

Wild Things fabric development team presents three FR base layer fabrics, each utilizing different combinations of wool, FR Rayon and Lyra to provide the best performance and protection in three different weights. These Next-Gen materials (no Modacrylic) allow for strong cold/wet weather performance AND FR protection without the awful smell that characterizes most existing FR base layers on the market today.

The Wild Things Base Layer-FR-Midweight provides FR protection, moisture wicking and a superb softness for next-to-skin comfort in a versatile cool and cold weather base layer. This mid-weight material, a combination of 55% FR Rayon, 33% Wool and 12% Nylon, wicks moisture well, does not retain body odor and provides superior FR protection.

FEATURES Form fitting design with flat seams for maximum comfort and performance • 5.0 oz/sq yd fabric weight • Antimicrobial treatment combined with Wool to resist odors • Passes ASTM 6413; No Melt, No Drip • Made in U.S.A. • Berry Amendment Compliant

Long Sleeve Crew-FR-Midweight Shoulder seam has been moved off the top of the shoulder to prevent chafing while wearing a pack or vest • Wrap around side seams follow the body's contour to enhance fit and comfort

Bottoms-FR-Midweight Gusseted crotch allows for full range of motion without constriction • Curved leg seams map the contours of the body to enhance fit and performance

Short Sleeve Crew-FR-Midweight A high-performance T-Shirt carefully designed to perform and protect • Shoulder seam has been moved off the top of the shoulder to prevent chafing while wearing a pack or vest • Wrap around side seams follow the body's contour to enhance fit and comfort • Approved by the US Air Force for use with FR uniforms • No Melt No Drip (NMND) Next-to-Skin Approved Product List • Weight: 6oz

Boxer Briefs-FR-Midweight Comfortable fit with FR protection for vital areas • Approved by the US Air Force for use with FR uniforms • No Melt No Drip (NMND) Next-to-Skin Approved Product List • Comfortable waistband • Easy-access fly • Gusseted crotch prevents constriction and allows for full range of motion • Weight: 4.8oz

SMOKING JACKET™-FR

Lightweight insulated jacket with superior FR protection

We use our proprietary four-layer fire protection system developed by the Wild Things product development team to insure full protection from flash fire AND protection from cold, wet weather in a cost effective product.

The Smoking Jacket™ is designed to function, wear, and pack as a lightweight insulated jacket. A water-resistant shell combined with minimal seaming keeps wind and water out. The Smoking Jacket™ features an innovative neck seal engineered to keep flames away from skin and base layers while acting as a typical high protective collar. FR protection extends to every detail of the Smoking Jacket™.

FEATURES Innovative layered construction maximizes FR capability

- 2oz FR synthetic insulation
- Passed 4 second Pyroman burn test with zero 2nd or 3rd degree burns
- Excellent performance in cold, wet weather
- Packable warmth and FR protection
- Weight: 11b 13oz
- Made in U.S.A.
- Berry Amendment Compliant

LOW LOFT JACKET-FR-GT

Windproof, water resistant, highly breathable with FR protection

The Low Loft Jacket-FR-GT combines Gore's innovative PYRAD® Flame Retardant Technology on a tight woven 4oz/yd 100% Nylon face fabric with Gore's new FASTPACK® technology for windproof, water resistant and highly breathable protection. GORE® PYRAD® Flame Retardant Technology is an innovative, self-extinguishing technology that adds heat and flame protection properties to non-FR textiles.

The result is our best low loft FR garment with the outstanding performance in cold weather that you expect from Wild Things and Gore.

FEATURES 2 Layer GORE Military Fabric® with GORE® PYRAD® and FASTPACK® Technology • Excellent performance in 4 sec Pyroman test • Low shrinkage and no break-open after flashover • Best in class mechanical integrity after flashover • 80 grams of PrimaLoft® Fusion synthetic insulation • Excellent performance in cold, wet weather • Packable warmth and FR protection in a light weight, compressible package • Performance comparable to PCU level 3B but with FR protection • Weight: 1lb 13oz • Made in U.S.A. • Berry Amendment Compliant

TRANSPORT PARKA-FR

Overlay for cold weather static operations

Wild Things extensive experience designing extreme cold weather products for military and alpine users is evident in the Transport Parka-FR. We use our proprietary four-layer fire protection system developed by the Wild Things product development team to insure full protection from flash fire. This product exceeds the standard 4 second burn test in the NC State PyroMan Burn Chamber. We use a proven FR face fabric with a variety of FR and cold weather layers underneath to provide fire and cold/wet weather protection. This jacket is perfect as an overlayer for helo travel. 6 oz of FR Synthetic insulation, a massive hood and internal collar provide maximum protection against wind, cold and snow.

FEATURES Ideal for sub-zero temperatures • Designed for static operations. (i.e. Helo transport, Sniper, ISR, Patrol, Garrison, etc • 70 denier textured Nylon shell • 6 oz FR synthetic insulation • Helmet compatible hood • Two external hand warmer pockets • Two internal FR mesh pockets to stash water bottle or to dry wet gloves • Hidden adjustable hem allows for cinching of the waist without an external drawcord • FR zippers and FR zipper pulls • Weight: 3lb 4oz • Made in U.S.A. • Berry Amendment Compliant

HARD SHELL JACKET-FR-GT

Adapted from our expedition tested consumer Alpinist Jacket, this new Gore-Tex® version achieves Gore's Defense Performance Standard – 2 (DPS-2) in a 4.8 oz/yd 100% Nylon ripstop. We use GORE's new 2 Layer GORE-TEX® hardshell fabric with GORE® PYRAD® flame retardant. This flame retardant technology is an innovative, self-extinguishing technology that adds heat and flame protection properties to non-FR textiles. 40 denier fibers provide just the right balance of light weight and rugged abrasion resistance. This new Gore textile provides strength, durability and Gore's durable waterproof/breathable weather protection AND a FR protection. This jacket has been carefully designed for maximum movement capability. Pattern pieces fit the contours of the body for comfort – the jacket is fitted, cut for ease of movement, and is designed to be worn under body armor.

FEATURES 40d 100% Nylon 2 Layer GORE-TEX® hardshell fabric with GORE® PYRAD® flame retardant • Fully Seam Sealed • Durable construction to protect you against dirt, dust, sand, hail, rain and snow • 3-D shaping at the elbows and shoulders for improved fit and ease of movement • Adjustable, helmet compatible hood • Adjustable hem • Fleece chin guard • Two waterproof chest pockets • Center front storm flap • Hidden hem cord-lock adjustment tucks into an internal pocket to prevent snagging • Weight: 1lb 7oz • Made in U.S.A. • Berry Amendment Compliant
