RUGGEDIZED

Increased cable durability and ruggedness with new integrated cable management system.

IMPROVED FIT

New smaller and contoured earpiece design provides a better fit to even more ear sizes.

PERFORMANCE

The new X5 provides best in class hear-thru audio, certified hearing protection and outstanding voice clarity.

ULTIMATE COMFORT

New patented Soft Spring™ now comes in 3 Different sizes to provide superior comfort and a more customized fit to your ear.

INVISIO PATENTED BONE CONDUCTION

The extensively fielded and combat proven INVISIO X5 is a dual in-ear headset that provides hearing protection and enhanced electronic hear-thru that utilizes patented INVISIO Bone Conduction Microphone Technology. This technology captures speech directly from the inner ear via vibrations off the jawbone. This unique technology allows for ultimate speech clarity in high noise or combat applications.

The INVISIO X5 headset has industry leading hearing protection (29NRR/32SNR), audio quality and situational awareness in a small and comfortable in-ear wearing style.

SOFT SPRING™

Three unique sizes of the patented INVISIO Soft Springs makes it easier to zero in on the perfect fit.

SMALLER DESIGN

Smaller and more ergonomic earpiece housing provides a more natural and comfortable fit for a broader range of ear sizes.

RUGGED CABLES

Heavy duty cable design provides increased durability near the ear while still providing a light and comfortable fit even when wearing glasses or goggles.

COMPLY™ TIPS

New color coded Comply Foam Tips are available in 6 different sizes to provide you the best level of hearing protection and fit.

CONTROL UNITS

INVISIO S10 HEADSET SYSTEM

Simple and lightweight, the S10 is a headset system that can be used with standard push-to-talk switches or PTT enabled radios.

INVISIO V30 SINGLE or DUAL-COM SYSTEM

A simple to use system that has a hardwired headset and primary radio cable. The V30 allows for easy plug and go operation and is available for select military radios.

INVISIO X50 DUAL-COM SYSTEM

A modular control unit with an integrated battery that can connect and control up to 2 devices simultaneously.

INVISIO V60 QUAD-COM SYSTEM

This advanced system allows you to seamlessly integrate up to 3 separate devices and communicate on up to 4 different channels (using a dual-net radio). The smallest and most capable system on the market!
