

# FOR105 - TAC PACK W/ DWD SYSTEM

Dynamic Weight Distribution

## Dimensions:

26 in L x 16 in W x 16 in D  
86 cm L x 35 cm W x 38 cm D

**Capacity:** over 7,100 cubic inches  
over 117 Liters

**Weight:** 7.3 lbs (Empty)  
3.3 kg

Colors: COY, ACU, ABU, Multi-Cam. BLK

# FOR105 – TAC PACK W/ DWD SYSTEM

Colors: COY, ACU, ABU, Multi-Cam. BLK

## Reducing Burden

- The FOR105 TACPAC with DWD utilizes FPG's L-5 EFS (ExoSkeleton Frame System).
- It allows the user to regain the natural flexibility felt when not carrying heavy loads.
- The Spine Bar's L-5 ExoSkeleton joint provides a pivoting load bearing capability that allows the body to flex while maintaining the load's stability against your body.
- With a simple push of a button, that can be worn on either side, the user can make adjustments on the fly.

## Comfort / Adjustability

- Sizing and fit are keys to Infantry performance
- The DWD has two sizes "Medium and Large". Fine adjustments within those two sizes are easily made.
- The FOR105 TACPAC with DWD is designed for heavy field use while making the burden of carrying heavy loads as comfortable as possible.
- Special high density foam back pads allow comfort while shrouding the DWD. These also allow great ventilation in hotter climates

## Modularity

- The DWD system is modular and can be used in different systems.
- It attaches to existing PALS (MOLLE) systems allowing you to shift the weight from the shoulders to the hips..... (PLATE CARRIERS)
