## WEAPON LIGHT READY

The Incog Shadow is a weapon light capable IWB holster built by G-Code and Haley Strategic. The Shadow is offered both as a stand alone single clip system and as a dual clip system that is compatible with Incog mag caddies.

The Shadow is currently available for the Glock 19, Glock 17, H&K VP9 and the 4.5" Smith & Wesson M&P in 9mm and .40 S&W equipped with Surefire X300 or X300 Ultra Weapon Lights.

A close-up photograph of two black holsters, likely made of leather or a similar material, showing the clips that attach them to a belt. The clips are embossed with a dragonfly logo. The holsters are positioned diagonally across the frame, with one in the foreground and one slightly behind it. The lighting is dramatic, highlighting the texture of the material and the metallic sheen of the clips.

# INCOG CLIPS

Like every holster in the Incog line, the key feature is how the holster interfaces with the belt. Using the “Incog Clip”, Incog Holsters can be donned or removed in seconds with a positive engagement when secured on an end users belt. The clips also keep the holster very tight to the body, preventing the holster and weapon system from printing on clothing.

# CAMO OR FUZZ

All INCOG holster products come with a camouflage or Tactical Fuzz laminate. Tactical Fuzz is a "suede like" synthetic that significantly reduces noise during movement, lowers the holsters reflective signature and presents a "softer" surface against skin. Tactical Fuzz is currently offered in Black, Tan, Slate-Blue and Grey.
