

ELITE SERIES

Level 3 Standalone Hard Armour Plate

Product Highlights

- Extremely lightweight (1580 grams)
- Ergonomic triple curve design contoured to fit chest and back comfortably
- Sized at 10" X 12" with optimized shooter's cut
- Highly buoyant and waterproof (fresh and salt water)
- Integrated D3O® Impact Protection
- Rated at NIJ (0101.06) Level 3 Standalone
- Multi-Hit performance (6+ rounds) of 7.62 X 51mm FMJ, steel jacketed bullets (U.S. Military designation M80) with a specified mass of 9.6 g (147 gr) and a velocity of 847 m/s \pm 9.1 m/s (2780 ft/s \pm 30 ft/s) and all lesser threats including 7.62 X 39mm and 5.56 X 45mm
- Completely non-fragile
- Performs in extreme cold and heat without delamination
- Patented Edge Binding Technology
- Zero Spall on impact

LINE OF FIRE Inc. is proud to introduce it's newest protective armour product - The ELITE series.

Rated at NIJ (0101.06) level 3 standalone, this new insert is the culmination of 8 years of product development in a proprietary multi-layered, fully composite lightweight armour plate.

The ELITE series is completely non-fragile and contains no ceramic or metallic material. Unlike conventional ceramic based armours which need to be handled with extreme care and x-rayed periodically to ensure integrity, our armour is - and always has been - capable of withstanding real world abuse. The ELITE series offers a lower overall cost of ownership and increased operator confidence.

Our patented and exclusive Edge Binding technology allows the ELITE plate to take ballistic impacts right to the edge of the plate without losing integrity. Our layering system of multiple Honeywell™ advanced ballistic materials allows the ELITE armour to catch and stop the projectile without creating spall. The addition of an integrated D3O® Impact Protection layer reduces energy transfer to the wearer by an additional 35% offering unrivaled protection.

The ELITE is highly buoyant and completely waterproof making it the perfect choice for any waterbourne operations.

We demand the best, which is why we exclusively use:
Honeywell | Advanced Fibers and Composites
