How do *YOU* wear *YOUR* **Trauma Kit...**

and what
condition is it in?

Proven in Afghanistan and Iraq, the Phokus Trauma Kit is engineered to be durable, lightweight, and efficient during trauma treatment. From the full custom kit to the pocket-sized Shield, the Phokus Trauma Kits are battle tested innovations that increase survivability.

CONTENTS (contents may vary)

-  2" Safety Pins x2
-  Nitrile Gloves
-  3" Elastic Bandage
-  Occlusive Dressing x2
-  Z-Fold Gauze
-  Combat Gauze
-  14G Needle
-  NPA w/ 550
-  Sharpie
-  Casualty Card

* DTK II features an external pill pouch.

DTK & DTK 2

The original Phokus Trauma kit design, the **Deployment** Trauma Kit was made to fit easily and securely behind an Operator's ballistic plates or concealable armor. Patented design includes a pull-tab and "rip-cord" for rapid deployment. Ballistic protection on the Operator offers a safe location to wear essential medical gear.

* LVD II features an external pill pouch.

LVD & LVD 2

The **Low Visibility** Trauma Kit features low profile packaging designed to easily fit in a cargo pocket or in a small pouch on the lower back. The LVD/LVD II can be carried in addition to the DTK/DTK II, allowing the Operator enough gear for Self-Aid and Buddy-Aid.

War Fighter Bundles

Today's warfighters are called upon to serve in various capacities. Whether on the FOB, assigned to a personal security detail, or on patrol, the Warfighter Bundle V1 ensures your lifesaving medical gear is always at the ready. The Warfighter Bundle V1 is comprised of our three top selling kits and provides immediate access to vital life-saving gear regardless of your uniform for the day. Combined, these three kits allow Warfighters to render self-aid/ buddy-aid whenever and wherever the need arises.

BREATHING AND AIRWAY SUB KITS

Designed for medical bags, specialty sub kits offer Operators configuration options in order to distribute kits quickly and efficiently during trauma treatment. Specialty sub kits focus on the specific trauma at hand, containing vital medical gear essential for treatment. Our innovative Hook & Loop fastening system keeps your gear organized when every second counts.

Designed for medical bags.
Welded Hook & Loop is ideal for modularization.

*Supplies not included

ZIPPERED KITS

All Phokus Trauma Kits are available to order in a zippered version of the heavy-duty medical grade vinyl packaging to simulate ripcord opening for trauma treatment training.

SHIELD AND LOW VISIBILITY POUCH

Made from soft shell fabric featuring a deployment handle to draw the trauma kit up and out of the stretch fabric pocket.

A maritime resistant plastic snap provides additional security to the hook and loop fastening deployment handle

Can be mounted on molle or on your belt in the small of your back

HOPLITE | NIGHT VISION FOCUSING COVER

HL-1
Have you ever come off your weapon to adjust NVG focus? Does your mission require constant distance changes from far to near? Now, the Hoplite Focusing Cover gives you a critical advantage while on Night Vision. Its patented technology allows your NVG's to stay focused out to infinity while adding visual clarity for **patient assessment** at 1-to-5 feet.
