

VENTRA

MAINFRAME™

The first of its kind, this revolutionary new patent pending backpack frame can be universally integrated with ANY backpack.

This frame allows any backpack you already own, or any backpack you purchase in the future to have exceptional breathability, comfort, and support.

No need to size this frame to the backpacks you intend to use, the frame is sized to fit the user's torso length, rather than the backpack size.

Whether you're carrying a 20 liter commuting pack or a 65 liter backpacking pack, enjoy wonderful ventilation and comfort with the Ventra Mainframe.
