CRKT®

OFFICIALLY LICENSED RUGER® PRODUCT

FROM RUGGED, RELIABLE FIREARMS® TO RUGGED RELIABLE KNIVES, MADE & DESIGNED BY CRKT®

This exclusive Ruger® knife line includes designs for everyday carry, hunting, tactical uses and self-preparedness. The knives are crafted in varying sizes and finishes, with an assortment of blade edges. Developed by six master knife-smiths who combined their knowledge of the art with aesthetic details from Ruger® firearms, the line offers unique knives with the important features that every good knife should have. These knives are purpose built to be durable and highly functional in the environments where Ruger customers will expect them to perform.

Manufactured by CRKT® under license from Sturm, Ruger & Co., Inc.

BILL HARSEY - OREGON, U.S.A.

Knife making started out for Bill as a combination of growing up hunting and fishing in the outdoors of Oregon and an interest in working steel. Bill started by welding on logging equipment at the age of 15. His interest in heat treating and manufacturing tool steels is core to what he does. Design is a key element for Bill in his work and knowing that the knife continues to be a useful tool in the human hand even in this age of technology.

RYAN JOHNSON - TENNESSEE, U.S.A.

The fireplace is never without wood at the Johnson house. That's because for years at RMJ Tactical, Ryan has been building some of the finest custom Tomahawks this country has ever seen. Applying modern engineering to centuries-old tool and weapon concepts, he redefined the role of Tomahawks in law enforcement and Special Forces military applications.

KEN STEIGERWALT - PENNSYLVANIA, U.S.A.

Ever since he was a kid, if Ken needed a knife, he just made one. His first knife was built from a saw blade at the kitchen table using a vise, files and sandpaper. Needless to say, he's gone on to create more highly-designed knives that have won 11 Blade Show Awards in seven consecutive years, including two Best Folder awards and one award for Best Folder of the Year. He also co-designed the patented Fire Safe® safety innovation, which is used on many CRKT® knives.

MATTHEW LERCH - WISCONSIN, U.S.A.

Trained initially as a jeweler/watchmaker, Matthew progressed into manufacturing and tool making. Now he has a few patents under his belt for innovations, like the Fire Safe®, and has been honored with some prestigious awards including the Buster Warenski Award. Matt views knives as functional art, as evidenced in his Moxie™ and Blade Show Award-winning Endorser™ design.

ROBERT CARTER - TEXAS, U.S.A.

Knife making with a family tradition. Robert Carter of Texas is the son of Joe Pardue and grandson to Mel Pardue. He started by helping his grandfather in the shop as a young kid, then began helping his father make knives. Robert has been designing and making knives on his own for several years and he creates detailed master-level knives crafted with high grade materials. His design inspiration comes from the military's need for rugged and purposeful gear.

KEN ONION - HAWAII, U.S.A.

Ken is the real deal. The youngest ever inductee into the Blade Magazine Hall of Fame in 2008, he is recognized as one of the most innovative and successful knife designers of all time. In 1996 he created the first commercially successful assisted opening mechanism, which many knives continue to use today. Designer of the successful Eros™ folder series, as well as the award winning Hi-Jinx™, and the new Homefront™ knife, featuring Field Strip Technology, Ken never seems to be at a loss for ideas.

NEW MUZZLE-BRAKE™

Designed By Ken Onion - Hawaii, U.S.A.

The Muzzle-Brake™ has elements from a traditional bowie design but is developed with the construction techniques of today. With its stout full tang blade, it can be used as a chopper in camp or for fashioning a quick shelter in the forest if needed. Its clip point blade shape, featuring a blood groove, is perfect for making quick work of butchering an animal after a successful hunt. The handle is glass filled nylon construction that wraps around a thick blade tang. The sure-grip surface matches the Ruger American Rifle® stock texture with Ruger eagles embossed into both sides of the grip.

MSRP: \$99.99

Blade:	Length: 7.50" (190.50 mm)
	Edge: Plain

RUGER® CENTENNIAL KNIFE

Designed By **Bill Harsey** - Oregon, U.S.A.

The Ruger® Centennial knife from CRKT®, produced in honor of William B. Ruger's 100th birthday, is a stainless steel, full tang fixed blade that is 100% hand crafted in the U.S.A. Designed by award winning knife maker Bill Harsey, this knife incorporates a rugged full tang and handcrafted laminate wood handles with embedded Ruger eagle medallions, affixed with stainless steel grip screws. The handles are contoured for positive grip even in wet conditions. Harsey gave the Centennial knife a sturdy, long swept, semi-drop point satin finish blade; this blade design is field proven for cutting efficiency. A 154CM blade steel was selected for excellent, long lasting edge retention. The design, shape, deep bevel grind and finish speak to rugged, reliable Ruger.

Blade Length: 4.00" (114.30 mm) Handles: Laminate Hardwood
 Overall length: 8.875" (250.82 mm) Sheath: Stitched Leather with Belt Loop
 Blade steel: 154CM
 Blade thickness: .173" (4.39 mm) Available Exclusively Through Ruger
 Hardness: 56-58

CRKT LIFETIME WARRANTY

This warranty covers any defects in materials or workmanship. If one of our knives ever breaks or fails because of material or manufacturing defect, we'll replace the knife.

This warranty runs as long as you own your knife. Coverage ends if you sell or otherwise transfer the knife to someone else, or if your CRKT® knife is modified in any way.

This warranty does not cover breakage or failure due to misuse of the knife. Knives as good as ours rarely break or fail because of a defect. Usually they break or fail from what we call "tool abuse"—using them for unsuitable tasks like prying or pounding. Therefore, blade tip breakage is not covered by our warranty. Use of a knife for any purpose other than cutting voids the warranty. So please match the tool to the task, and use your knife only for cutting. The knife will last longer, and you'll be safer too. This warranty does not cover failure of mechanisms due to your failure to properly maintain them.

Misuse of your knife can cause serious injury or even death. It can also cause your knife to break or fail and the warranty will not apply. Failure to properly maintain your knife also may cause its mechanisms to not function properly, which could result in injury to you or damage to the knife.

Finally, consequential and incidental damages are not recoverable under this warranty. Some states do not allow the exclusion or limitation of consequential damages, so this exclusion or limitation may not apply to you.
