

L5AWM

Advanced Warfighter Magazine

Lancer set out to engineer a better 5.56 magazine; one with the reliability of steel, durability of polymer and weight of aluminum – the L5AWM. The magazine design includes a one-piece, wrap-around steel feed lip assembly and an aggressive surface texture to create the ultimate hybrid magazine tough enough for military, LE and commercial use. The internal geometry of the Advanced Warfighter Magazine is a constant curvature utilizing a non-tilting follower for reliable feeding of 5.56X45mm NATO ammunition. The body and component materials are corrosion and chemical resistant, passing military chemical testing.

Features & Benefits

Steel feed lips

- Increased durability compared to competing polymer and aluminum magazines
- Does not creep due to increased temperature during high volume firing; ensuring magazine will drop free during sustained fire
- Magazine feed lips will not creep due to long-term storage while loaded

High performance impact resistant

- Increases magazine service life versus competing polymer and aluminum magazines
- Aggressive texture improves purchase and user manipulation from pouches to weapon insertion/extraction
- Translucent options offer the following advantages
 - Round markers for capacity
 - Ammunition identification
 - Speeds ammunition consolidation
 - Pre and post combat inspections

Super tough impact resistant polymer

- Slim design allows compatibility with most pouches
- Easy removal for cleaning or interchanging
- Replacement floorplates are available with water drain hole
