Level II

POWER STRETCH ¼ - ZIP PULLOVER, PANTS, & SHORTS – Power Stretch® by Polartec® provides excellent breathability, superb moisture wicking and excellent insulation warmth. Expedition-weight thermal fabric with four-way stretch, offers good wind and abrasion resistance, all flat-locked seam construction reduces chaffing next to skin. Use these pieces for lightweight warmth during high energy, cool weather activity, or integrate as part of an expedition-weight base layer system. Pullover #60002 Coyote – Pant #60001 Coyote – Shorts #61047 Coyote *Power Stretch ¼-Zip Pullover also available in ALL BLACK (#60002-0BL)

Level III

LOW LOFT JACKET– A lightweight insulated 4-season mid to outer layer, packed with 2.4 ounces PrimaLoft® Silver Active insulation with W.L. Gore's new Light and Fast technology. Highly compressible; packs down easily and stuffs into either hand warmer pocket. Features 2-Layer fabric with GORE®, highly breathable, water resistant, and windproof protection expands the comfort of the jacket across a broad temperature range. PrimaLoft® insulation is highly compressible and very soft synthetic insulation. Warmth without bulk – a high warmth-to-weight ratio means you don't have to bulk to stay warm. Incredible water-resistance properties – absorbs less moisture from the start so you stay warmer and drier. Genuine MultiCam® pattern #51017 – also available in Coyote Brown #61017
FR Low Loft Systems also available

Level IV

WINDSHIRT WT - The Level IV Windshirt is designed to be worn in combination with base layer garments, uniform (BDU) and other Levels (i.e. Level VI) when heat loss through wind exposure (convection) is a concern. Thinner than a t-shirt, this is the most versatile piece you can use. The wind shirt can be worn underneath clothing as a vapor barrier; this will help avoid wetting out insulation layers in colder temps. It can also be used as an outer layer to protect from the wind. This layer is breathable and is designed as a wind-block with water repellency – allowing your body to capture and retain heat. Features 30 denier textured nylon with a durable water resistant (DWR) coating, a ½-zip style pullover, concealed zippers, elastic wrists and an adjustable shock-cord hem. Top #50150, Coyote Brown/50152 Multicam® - Pants #60033 Coyote/50033 Multicam®

Level VI

HARD SHELL JACKET S.O. (MULTICAM®) & HARD SHELL PANTS S.O. (MULTICAM®) - Designed for fast travel in nasty weather, the Wild Things Hard Shell SO Jacket and Pants are engineered to keep you and your protective gear dry, providing unsurpassed protection and comfort for enhanced mission performance. These lightweight garments are easy to pack, designed to accommodate under layers, articulated arms and knees, non-binding design, all features which allows you to move around and still react quickly to changing field and environmental conditions. New addition of pit zips that open through the waist hem allow for full access to kit and comm's. Manufactured with genuine 3-Layer GORE-TEX® Waterproof/Windproof/Breathable Military membrane fabric - fully taped and seam sealed this jacket and pants duo are designed to provide a broad level of environmental protection while withstanding the harshest of global weather conditions. Coyote Brown - Top - #51088 Multicam - Pants #50034 Multicam ***FR Hard Shell Systems also available***

Level VII

HIGH LOFT JACKET S.O. & HIGH LOFT PANTS S.O. - A fully insulated, wind & water resistant parka and pant designed for extreme cold weather conditions (ECW). The Wild Things High Loft Jacket and Pants provides ultimate warmth; the High Loft Jacket SO is packed with 6 ounces of PrimaLoft® Silver Active synthetic insulation, the High Loft Pants SO are packed with 4 ounces of PrimaLoft® Silver Active synthetic insulation, both this jacket and pant provide incredible warmth even when wet. The outer shell of these garments is made of tough 70 denier textured nylon, with 330 denier Cordura® abrasion resistant panels reinforcing the elbows, knees, instep, and seat. Many built-in design features in both jacket and pants with the military end-user in mind who must be able to operate in an extreme cold weather environment. This jacket and pant set provides extreme cold weather protection for both Static and Active ECW operations, best used in conjunction with other Protective Combat Uniform (PCU) Levels (i.e. II, III, IV – vapor barrier, V) Top #60023 Coyote Brown/50023 Multicam® - Pants #60043 Coyote Brown/50043 Multicam®

White Out® Over White System

WHITE OUT® OVER WHITE SYSTEM - Over whites provide valuable protection when the snow flies or when moving into higher altitudes and across snowpack. Primary concerns are light weight, low bulk and ease of donning and doffing. Pack and body coverage are vital. Wild Things has you covered. Traditional Over whites are made of cotton. Heavy. Hold water. Prone to mildew. Our White Out™ Over Whites do more than just help you blend into the snow. We use a functional and durable 70-denier nylon fabric that is abrasion resistant, blocks the wind and is treated with a durable water resistant finish. We also added a near IR suppressant to provide additional protection. Jacket #70007, Pant #70001, Pack Cover(s) #70003 – Multicam® Alpine

Knuckle Roaster FR

KNUCKLE ROASTER FR - The Knuckle Roaster hand warmer is designed to provide warmth and comfort in the field. It allows you to wear lighter weight gloves in cold weather, to maintain dexterity by giving you a warm place to put your hands. You can forgo gloves all together in cool or wet weather and still have full dexterity. It features an FR Cordura outer fabric that provides excellent durability, wind and water resistance, and FR protection. The interior is lined with FR fleece for warmth. The reinforced web belt adjusts to various waist sizes with an easy-to- use buckle. Includes and exterior zippered storage pocket. Multicam® #50180; Coyote #60180
