TC BYO

Tactical Concealment Base Layer Construction Kits

Take your concealment garment construction to a whole new level and achieve results like never before in less than half the time with The TC BYO Kit.

(Above)
TC Foliage Attach cord (image shown in kit to left) has been affixed/hand tied onto the base layer via one of five different tie on methods.

When used in combination with the gridwork allows for Excellent means to attach natural foliage to the garment.

(Below)

Natural foliage shown inserted & tied onto the base layer garment

TC Ghillie-Grid Cord (shown above in kit) was used to weave a square-grid pattern Throughout the garment body & hood & Secured with Shoe-Goo at the intersections where the grid cords intersect then covered with UV protective paint.

This garment is now ready to attach Jute, burlap & vegetation.

VEGETATION TIE CORDS

5 METHODS TO AFFIX TC VEGETATION TIE CORDS TO BASE LAYER GARMENT

Tactical Concealment Base Layer Construction Kits

Take your concealment garment construction to a whole new level and achieve results like never before in less than half the time with the TC BYO Kit.

TC base layer fabric mesh holes is for tying in veg-tie-cords and creating lattice/gridwork using nylon cord to attach and hold in place natural foliage, jute, burlap, trash, etc. to the garment.

This can be accomplished without the use of hand tools or a sewing machine.

**** This garment can be made operationally ready in less than 1 hour out of the box if absolute necessary****

...however we encourage you put your best crafting skills forward and take PRIDE in your Base Layer & Fieldcraft Awesomeness!

Method 1

Common Knot

Method 2

Sewn on

Method 3

Loop Knot Tied

Method 4

Loop Insert

Method 5

Cord-Loc applied to all tie cords to secure foliage
